When using a wood substrate, water and moisture damage tops the list of the most common problems. As a maker or buyer of a modular office, home or another structure, would you like to reduce your risk?

**WE HAVE THE SOLUTION!**

## How Do Azdel Onboard® Composite Panels Improve Construction and Performance?

Weight matters. Half the weight of wood means easier handling, hauling, & construction.

Water, moisture, humidity resistant. No warping, mold, mildew or rot!

Unaffected by freezing and warming cycles, helping to prevent delamination

No formaldehyde or other toxic chemicals or materials; No VOC's

Meets UL 723 (ASTM E84) Class B/II F.R. Rating; Class A/I available

Superior insulating properties

Sustainable; no deforestation occurs for its production

Sound absorbing material offers better noise barrier; 2.5X the NRC of plywood

Longer Construction Life

### Stock Composite Panels

UL 723 (ASTM E84) Class A	UL 723 (ASTM E84) Class B
2.9mm 	2.0mm 
3.6mm 	2.7mm 
5.5mm 	3.6mm 
7.5mm 	4.7mm 
	5.2mm 

We can produce virtually any flat sheet within these dimensions  
Width: 48" - 78" | Length: X to 144" | Thickness: 2.0mm - 7.5mm

### Modular Applications

- Exterior Panel Substrates
- Interior Wall Panels
- Divider & Partition Walls
- Entry & Closet Doors
- Water Resistance Panels
- Weight Reduction Panels
- Ceiling Panels
- Drop-in Ceiling Tiles
- Acoustic Panels
- Shelving
- Cabinetry
- More...
